

UPC Parks

Adventure has a new name!

The story of

It used to be adventure and excitement were found in nature's playground. There were trees to climb, rocks to explore, and boulders and logs to traverse.

That was the traditional way we played, the way nature intended.

Metal and plastic playgrounds give kids something to do,
but isn't there more?

With natural settings being lost to urbanization,
and electronics replacing active play, what can be
done to get kids playing outside again in their
natural environment?

- Offer variety in materials, designs, and play value.
- Have real challenge in the playground for all ability levels.
- Provide an exciting and authentic natural play experience!

Can we meet the challenge of providing an
exciting natural play experience?

How do we build a playground that offers the same play value, experience AND benefits AS NATURE?

Nature's environment, with its large climbing rocks, trees to swing from, and travel-friendly logs and boulders, has already provided us with the best examples of play.

By combining large Monolith climbers, Rope Bridges, and low-to-the-ground log and boulder Roamers, Rocks & Ropes creates a complete, fully integrated Linked-Play experience!

LINKED-PLAY

By functionally linking the parts within a playground, so kids can jump, hop or climb from one to another, the play value reaches its full potential.

Rocks & Ropes offers NATURAL ADVENTURE AND MOVEMENT
that other playgrounds just can't offer!

Monoliths, Ropes and Roamers are combined to create a
complete adventure!

Monoliths

large climbing structures

Ropes

Bridges, Nets & Webs

Roamers

Boulders and Logs

RUN, CLIMB, HOP, JUMP, SWING!

Kids run and hop across rock and log Roamers, climb up towering Monoliths and traverse across challenging Rope Bridges.

CLIMB!

MONOLITHS™

Monoliths are exciting climbers where kids can really go big!

Specially designed climbing faces provide a myriad of exploratory adventures unique to each design.

The solid PolyFiberCrete® texture offers the best in non-abrasive climbing grip and safety.

Monoliths work as the large anchor pieces in the playground.

Sturdy and solid with thousands of pounds of mass, the Monoliths allow ropes to be anchored in a secure manner.

MONOLITHS™

- large climbing structures -

Monoliths such as the giant Sequoia Log are designed to include kids of all ages and abilities so everyone can get in on the fun!

SWING!

Ropes

Rope Nets and Rope Bridges are where Kids can swing, shake and really test their agility!

Built with sturdy steel cores, each rope bridge offers a dynamic and unique play experience.

Benefits include:

- *Easy to replace and maintain.*
- *All internal anchoring system with no exposed hardware.*

Strong and super dynamic, our ropes connect to monoliths where kids can really move around!

From easy for the little ones to super hard and challenging!

Ropes

- Bridges, Nets & Webs -

Rope Bridges

Nets & Webs

BRIDGES:

- An authentic rugged outdoor crossing
- Offers dynamic action that Nets can't
- A great challenge for older kids

NETS & WEBS:

- More stable
- Promotes physical & social skills
- Good for younger ones

HOP! JUMP! RUN!

Roamers™

Roamers are the boulders and logs where kids can hop, jump and run!

They are inexpensive, low to the ground, and are an integral part of the linked-play experience.

Children can have access to every part of a playground without ever touching the ground!

The Hop Rocks are based on boulders and come in a variety of size options.

The Logs are designed from natural tree logs with unique bark-like texture.

Roamers™

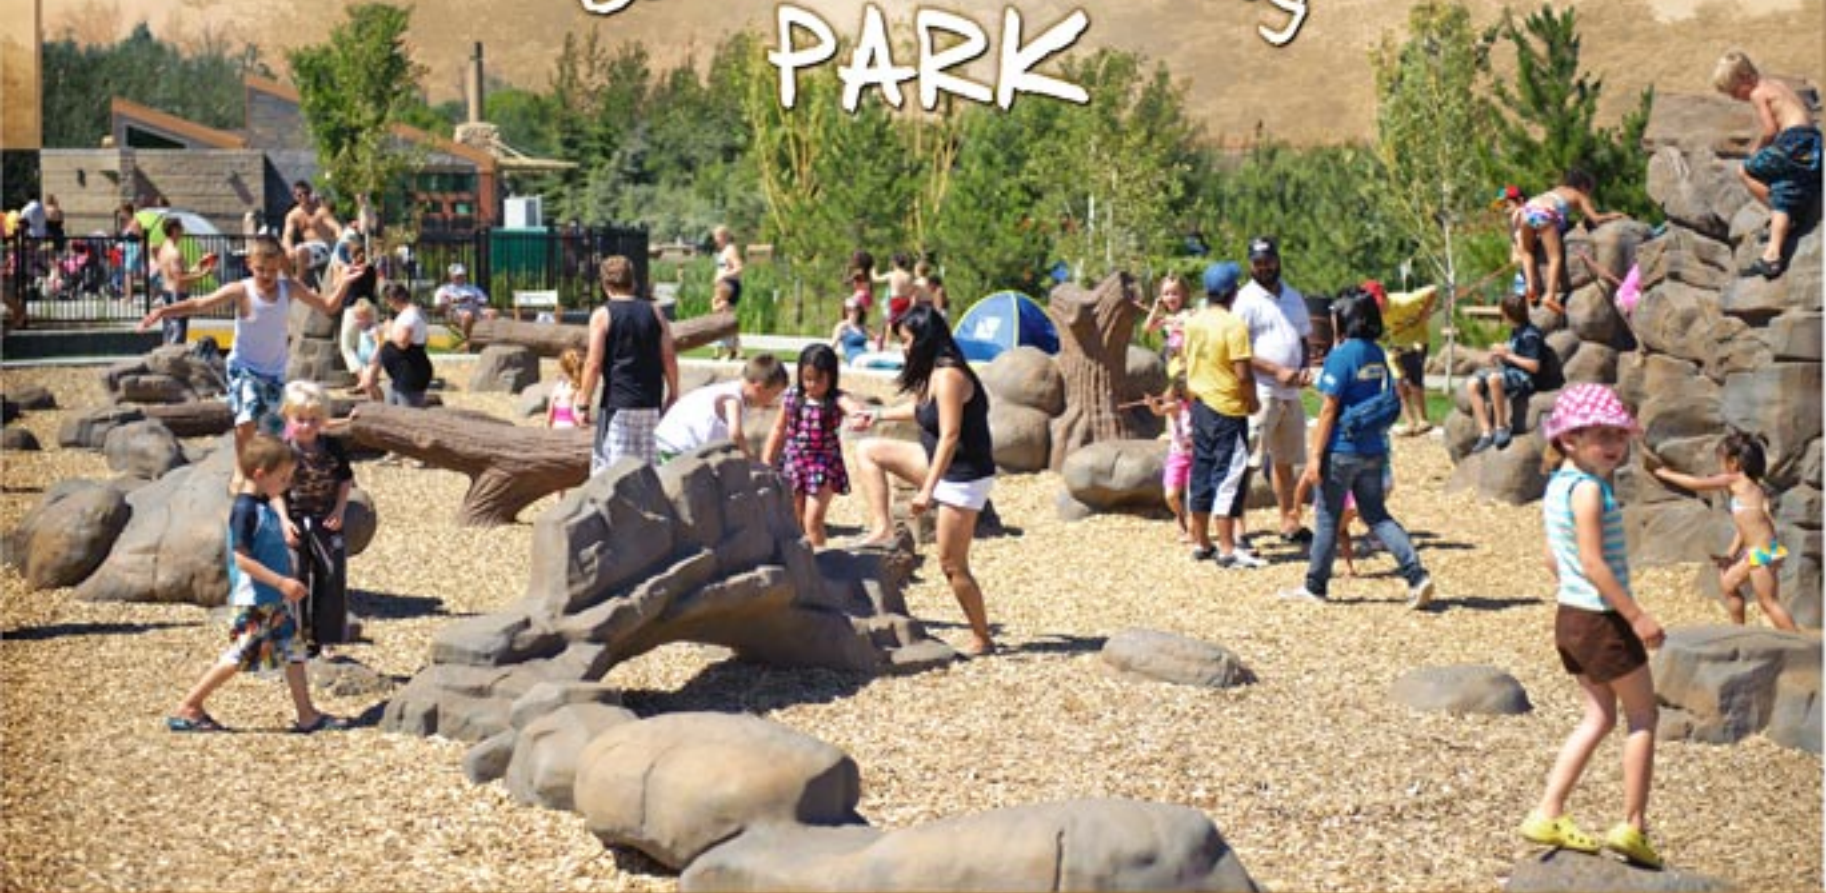

- Boulders AND Logs -

Some Roamers are designed for traveling.
Others are more exploratory.

Build AN AMAZING PARK

By linking Monoliths, Ropes and Roamers together,
you can create a complete linked-play experience that is
naturally fun and challenging for any age!

You can build a nature-inspired park in your area
for a value that can't be beat!

Parks can be completed on budget, on time!

Want to expand the play value, appeal and longevity
of a Post & Deck playground?

Deck heights from
12" to 5' can be
accommodated.

Challenge and adventure
for all ages!

Monoliths go to decks

Get maximum play value by
functionally linking the entire playground!

Roamers go to transition platforms

It's easy! By combining Rocks & Ropes with Post & Deck,
you can create a fully integrated Linked-Play experience,
maximizing the fun, value and life of any playground!

Our goal is to offer design and materials that provide
NATURAL ADVENTURE, EXPLORATION AND MOVEMENT!

What is 'nature play'?

Real nature play is the forest, the hills and the great outdoors. The goal of Rocks & Ropes is to offer the same kind of play value for kids to enjoy in today's playgrounds.

Why not just use real rocks and tree logs?

While real rocks and logs may be appropriate for teaching circles and playful landscapes, there are practical concerns when planning a commercial playground. Manufactured rocks and logs can meet engineering criteria for strength, longevity, and safety, as well being CPSC compliant. Rocks & Ropes packs more variety of climbing, play and adventure into each playground with caves, overhangs, ledges, footholds and handholds, rope bridges and nets. It's adventure for all ages!

Please see IPEMA website for certifications.

Functionally linked playgrounds offer
the best adventure!

We are committed to designing an authentic, engaging
outdoor experience that draws families outside again!

- Log Bench
- Wood Grain Table 4' & 8'
- Rock Retaining Wall
- Wood Grain Planter
- Wood Grain Trash
- Outdoor Classroom

When you build your playground you should want only
the best materials.

UPC Parks offers genuine PolyFiberCrete®

What is PolyFiberCrete®?

PolyFiberCrete is a solid, synthetic sandstone made with Portland Cement, fibers, sand, and proprietary add mixtures. It naturally has a variegated surface and authentic hairline cracks that looks like a real rock.

- PolyFiberCrete offers the best in non-abrasive climbing grip, safety and durability.
- Hit it with a sledgehammer and create more handholds!
- It doesn't crack or shatter like hollow products such as GFRC and fiberglass.
- PolyFiberCrete can only be chipped, not cracked open.

Your playgrounds deserve the best! Insist on genuine PolyFiberCrete®!

Whether you are looking to go big or small, our friendly staff and nationwide rep network can help you figure out what will work best for your location and budget.

We look forward to working with you!

We all want what's best for our kids. Naturally the solution is easy: the fun of an exciting, adventurous, natural play experience in modern playgrounds.

It's a choice we can all be happy with.
